RADIX SYSTEMS SERVICES CORPORATION is an information technology services company established to provide local and international clients with highly professional and superior data processing skills and other service products. Its area of focus is in applications development and maintenance for AS/400 (RPG & COBOL) and Internet (.NET, Java & LAMP) platforms.

RADIX is proud of the combined expertise of its own well-experienced technical staff and those of its associate firms. It is backed-up by a full-range of equipment and technological resources which it uses to address the specific needs and requirements of both local and foreign clients. RADIX partnership with Microsoft and IBM ensures access to the latest software releases.

What We Offer

Depending on the nature of the application and customer preference, RADIX provides technical manpower to conduct user-level requirements definition, detailed systems design, program coding, testing and installation. There are several alternative approaches currently being undertaken by RADIX, namely:

Applications Development

This approach involves a study of the clients' requirements based on user initiated specifications. Through interviews and sample documents, RADIX prepares a requirements definition document with system mock-up containing screens and reports jointly developed with the users. After final approval, it becomes the jump-off point for detailed design and software construction. Pricing and schedule estimates are based on pre-agreed project scope and contract deliverables.

Remote Systems Maintenance

Remote systems maintenance is an option for host based applications that can be supported via remote terminals. A team of IT staff will be dedicated solely for the maintenance and enhancement needs of the client. Charging is on an hourly rate based on the number of support personnel and skill levels required.

Web Based Applications

With internet connectivity, it is now possible to do concurrent development for web based applications. The process is similar to the traditional life cycle except the development environment is accessible to both developers and clients. Approvals and testing can be simultaneous since the client can see and verify the applications during construction phase..

Onsite Programming Support

For on-site software maintenance work, this approach is normally resorted to for faster coordination with the customer IT personnel and RADIX programmers. Customer selects the programmers recommended by RADIX based on specified skills and experience. Pricing is on an hourly basis plus out-of-pocket costs.

What We Have

RADIX has a team of highly trained professionals.

RADIX has a manpower complement that is highly qualified and knowledgeable in specific IT disciplines and business systems. RADIX can also tap the manpower pool of its associates to increase its capacity for peak period requirements. RADIX currently has over 120 technical personnel and can tap about 200 technical staff members of its associate firms. In total therefore, RADIX has access to over 300 DP professionals insuring its clients prompt completion of all project deliverables.

RADIX has the following technology focus.

Web Based Applications - .NET, Java & LAMP
Client Server – Visual Basic & SQL Server
Midrange Systems – AS/400 RPG & COBOL

RADIX has a full range of hardware and software.

To be able to service the specific needs and project requirements of its clients, RADIX has a full complement of hardware and software from stand alone PC's to local area networks to IBM midrange machines. Also, it has the necessary broadband communications infrastructure for internet access..

RADIX LIST OF CLIENTS

International Clients

- ◆ Call Henry, Inc., Titusville, FL
- ◆ Custom Systems Co., Cleveland, OH
- ◆ Prime Solutions Inc., Longmont, CO
- ◆ Legal & General, Netherlands
- ◆ Infa Software, Netherlands
- ◆ PPSS BV, Netherlands

Manufacturing and Distribution

- ◆ Abbott Laboratories
- ◆ Asian Transmission
- ◆ Avon Philippines
- ◆ Amkor/Anam Pilipinas Inc.
- ◆ Bristol-Myers Squibb
- ◆ Cemex Philippines
- ◆ Coca Cola Bottlers Co. Phils. Inc.
- ◆ Dole Philippines, Inc.
- ◆ Fiesta Brands Inc.
- ◆ Futaba Corporation
- ◆ Goodyear Philippines
- ◆ Johnson & Johnson
- ◆ Glaxo Smithkline
- ◆ Kraft Foods Inc.
- ◆ Matsushita Electric Phils. Corp.
- ◆ Nestle Philippines, Inc.
- ◆ Photokina Marketing Corporation
- ◆ Robinson's Department Store
- ◆ Tupperware Philippines
- ◆ Unilever Philippines, Inc.
- ◆ Zuellig / Interpharma Holdings

Services

- ◆ Accenture
- ◆ Ayala Systems Technology Inc.
- ◆ Headstrong
- ◆ Misys International
- ◆ Poblador Azada & Bucoy Law Office
- ◆ Questronix/ QNX Solutions
- ◆ SGS Far East Limited

Automotive

- ◆ Honda Cars Phils., Inc
- ◆ Honda Philippines
- ◆ Mitsubishi Motors
- ◆ Nissan Motor Philippines
- ◆ Pilipinas Hino Inc.
- ◆ Toyota Motor Phils, Inc

Banks and Financial Services

- ◆ ABN AMRO Bank
- ◆ Asiatrust Bank
- ◆ Banco de Oro
- ◆ Citibank
- ◆ East West Bank
- ◆ Hong Kong Bank
- ◆ May Bank
- ◆ Philam Savings Bank
